

Transfer Multisort Elektronik

MORE THAN AN ELECTRONIC COMPONENT DISTRIBUTOR

ABOUT US

Transfer Multisort Elektronik Sp. z o.o. is a family business established in 1989 in Łódź (Poland) as a small shop for electronic components.

Currently, TME is one of the most dynamically developing distributors of electronic components in the world.

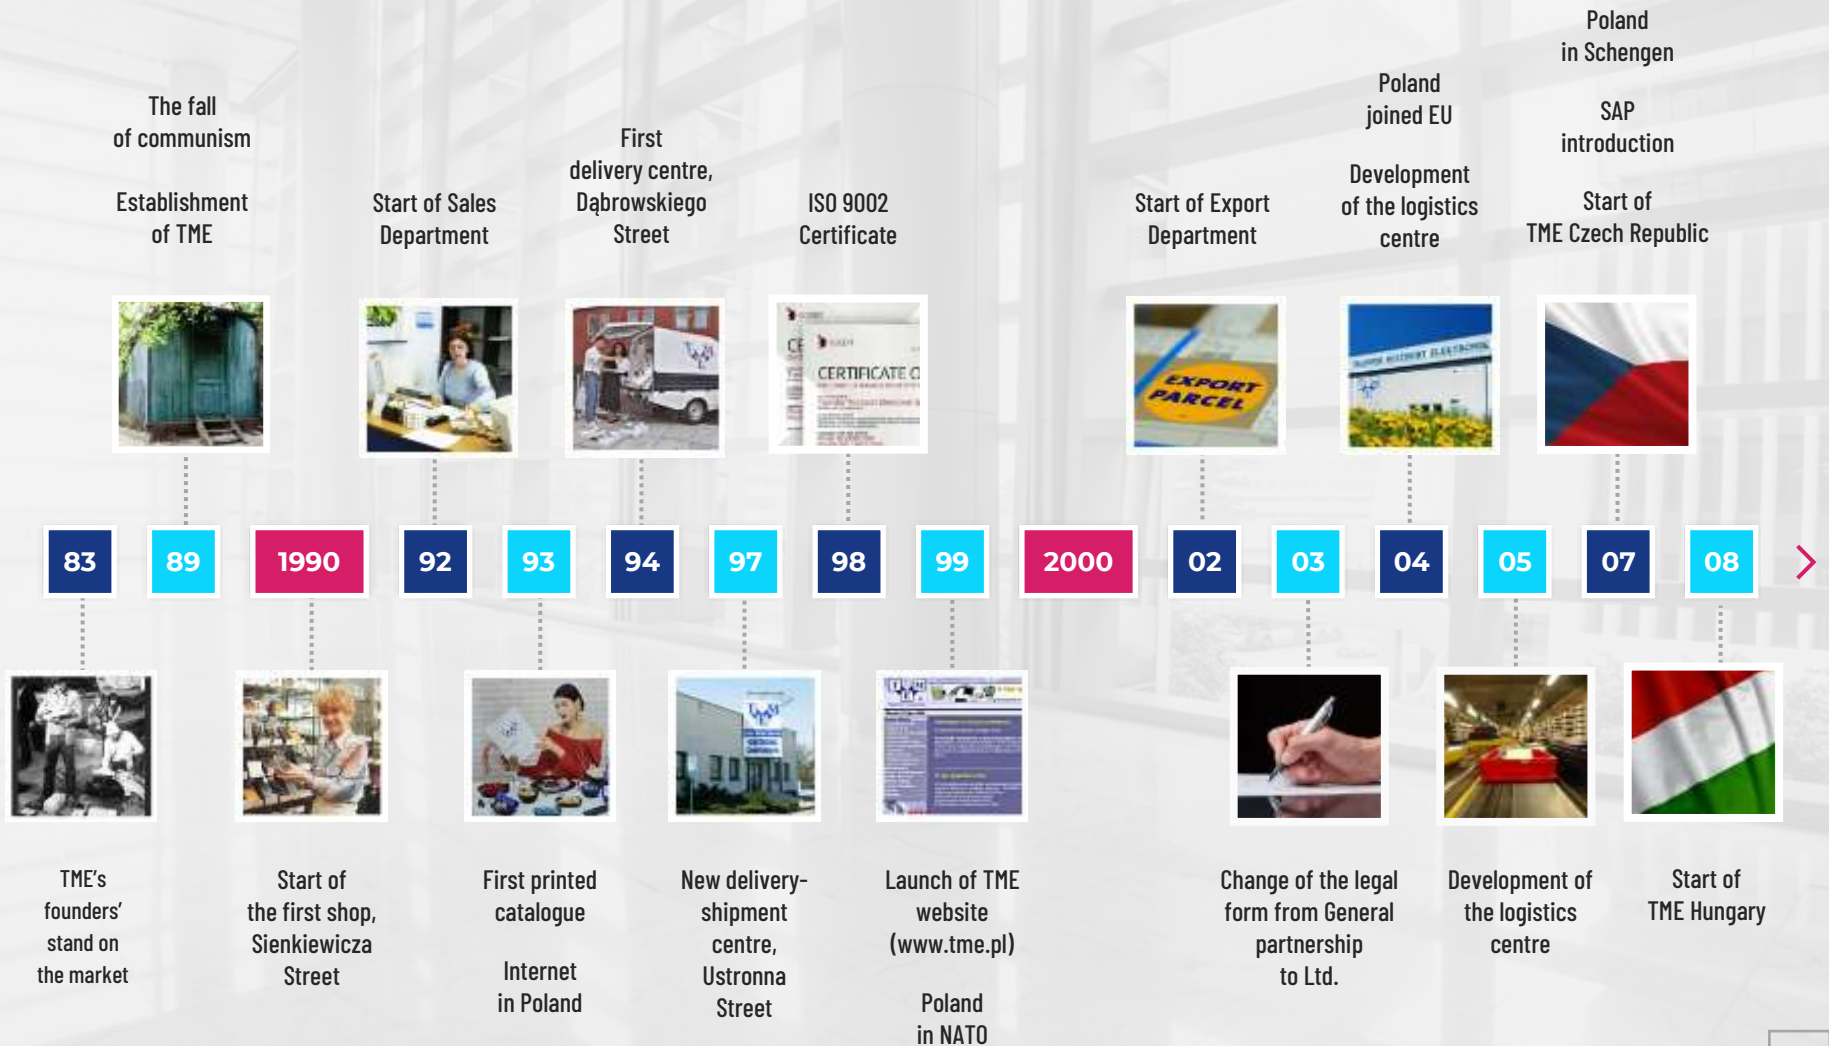

Our advantages are:

- modern solutions,
- large stock levels,
- fast delivery.

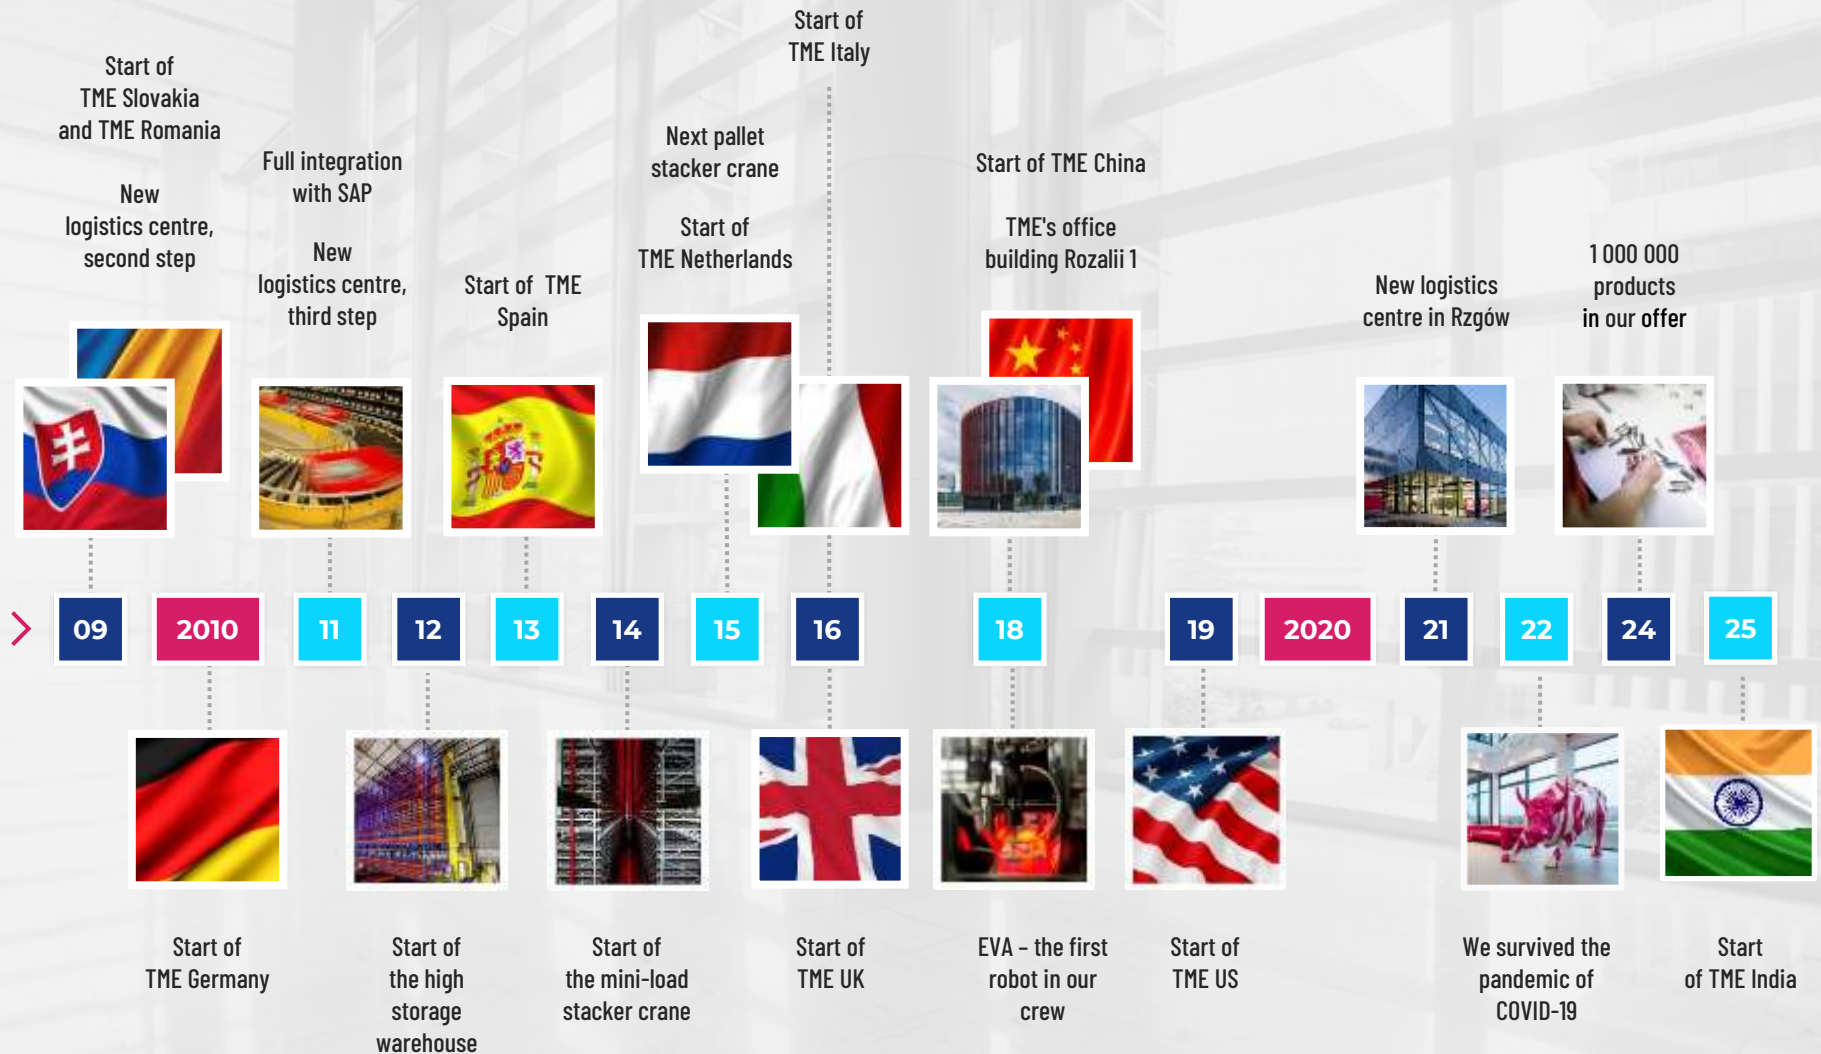

We maintain a high stock level, which speeds up the execution of orders. Over the years, tens of thousands of customers from around the world have trusted us.

PARCAT

TME uses its original PARCAT system, which is a comprehensive solution in product description management.

AS A RESULT:

- the product description is precise and legible,
- parametric search engine is available at tme.eu,
- thanks to the reduction of the translation costs (by approx. 50%), the description can be provided in many languages (currently in 30),
- the cost of printing of the catalogue has been reduced (by app. 35%).

API

Application Programming Interface

THE API INTEGRATES YOUR SOFTWARE WITH THE TME'S PURCHASING PLATFORM.

catalogue and product
specifications
in multiple languages

stock levels updated
on a regular basis

current prices, including
individual discounts,
in multiple currencies

data
transmission
security

We already have over 3 200 registered
API users.

Speed up your shopping with TME API,
visit <https://developers.tme.eu>.

With the help of the documentation
provided, you will be able to carry out
the integration process by yourself.

EDI allows for the electronic exchange of documents, including sales orders, order confirmations, invoices, shipment information, etc. and shortens their processing time.

faster order fulfillment

improvement of the trading process

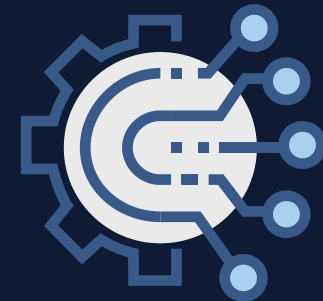

reduction of paper documentation

reducing the number of errors

We enable our contractors to exchange documents in the most popular data formats.

We'll help you integrate EDI technology with your company's standards.

LOGISTICS

We supply products to over 150 countries on different continents.

Payments in:
PLN, EUR, USD, GBP, HUF, CZK, RON, SEK, DKK

- flat delivery rates to more than 100 countries around the world
- air and road transport

ŁÓDŹ LOGISTICS CENTRE

On the surface of 19 500 m² we have:

- high and low storage space,
- automatic conveyor belts system,
- sorting and packaging system for collected orders.

ŁÓDŹ LOGISTICS CENTRE

The modern warehouse offers:

- 135 000 shelf locations,
- 255 000 places for storing totes in high storage warehouse,
- 16 500 pallet locations.

With this highly impressive and effective logistics technique, most items are offered immediately.

From here we send over 6 000 parcels a day, which go to customers in 150 countries around the world.

ŁÓDŹ LOGISTICS CENTRE

In 2014 new mini-load type stacker crane has been implemented. It is 23 m high and is one of the highest in Poland.

Currently there are:

- 5 pallet stacker cranes,
- 6 container stacker cranes (mini-load type),
- shuttle system.

RZGÓW LOGISTICS CENTRE

State-of-the-art logistics centre

- automated warehouse processes up to 1 300 parcels shipped per hour
- 165 000 locations in a rack storage
- automatic high storage warehouse with a capacity of 114 000 totes

2021

LAUNCH OF OPERATIONS

AUTOMATION IN LOGISTIC CENTRES

We are constantly striving to improve processes in our Logistics Centers.

The result of our work are original projects, which are often the first such solutions in the world, e.g. a modern, automated packing and invoicing zone.

The entirety of the emerging technology is compliant with the Machinery Directive 2006/42/EC and the relevant standards.

The warehouse is equipped with anti-static protection and dedicated areas of vacuum packaging and cooling, as well as a chemical section.

Thanks to this, we are able to control the quality and quantity of stored goods.

The Robotics Department is constantly working on robotization, automation and improvement of processes in TME Logistics Centres.

A yellow industrial robot arm is shown in a factory setting, holding a small, clear, rectangular product. The robot arm is yellow and black, with a red emergency stop button. The background is a blurred industrial environment with metal structures and pipes. A white square frame is visible in the top left corner.

ADAM - ŁÓDŹ

Robot that automatically issues orders for customers.

- replaces two manual positions
- possibility to work 24/7
- 3D vision system
- integrated with SAP
- qualitative and quantitative precision

EVA - ŁÓDŹ

Robot for automatic repackaging of products from collective packages into the small ones (1/5/10/50/100 pcs).

- possibility to work 24/7
- around 5 500 repackaged elements per hour

LABORATORY

QUALITY CONTROL

We are constantly verifying the quality of products from our offer to meet the customers' expectations.

ENGINEERS

Our qualified and experienced engineers perform all testing procedures according to the standards.

ISO

Quality management system helps us to continuously improve the quality of the products from our offer and services provided.

Currently, all our procedures meet the requirements of the quality control system ISO 9001:2015-10, which is confirmed by 34169/C/8 certificate.

For the protection of the environment, we have implemented ISO 14001:2015-09.

GREEN TME

TME aims to guarantee that all products from our offer meet the requirements of environmental protection act.

WEEE, Batteries

"No" to reckless waste management

RoHS

"No" to hazardous substances

REACH

"No" to toxic chemicals

ISO14001

Environmental Management System in accordance with
ISO 14001:2015-09
