

**SINBON**

# COMPANY PROFILE

LEADING SOLUTION PROVIDER

for Electronic Component Integration Design & Manufacturing

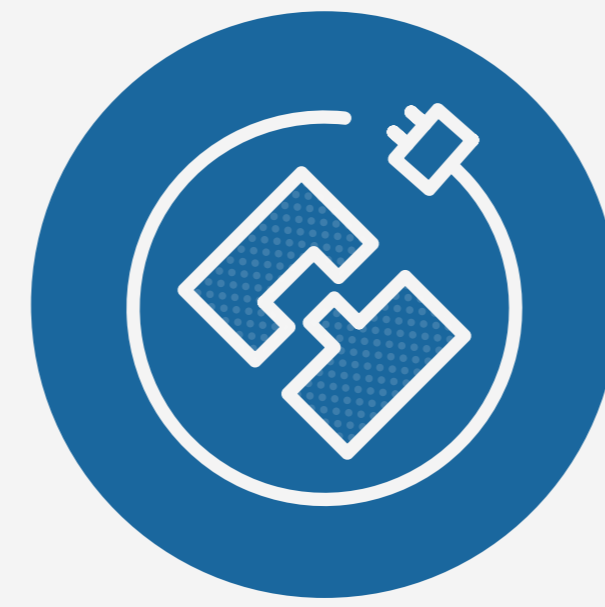

# Our Summary

SINBON (TWSE : 3023) is a world-leading provider of integrated design & production services of bespoke **interconnect solutions**.

We offer **customized products** and **OEM / ODM services** for customers to ensure continuous reliability and efficiency.

We combine engineering services and industry know-how to offer value-added service support that fits the business needs of various industries.

## We Provide

Customized Connectors

Cable Assembly Manufacture

PCBA Design & Manufacture

Box Build

System Integration

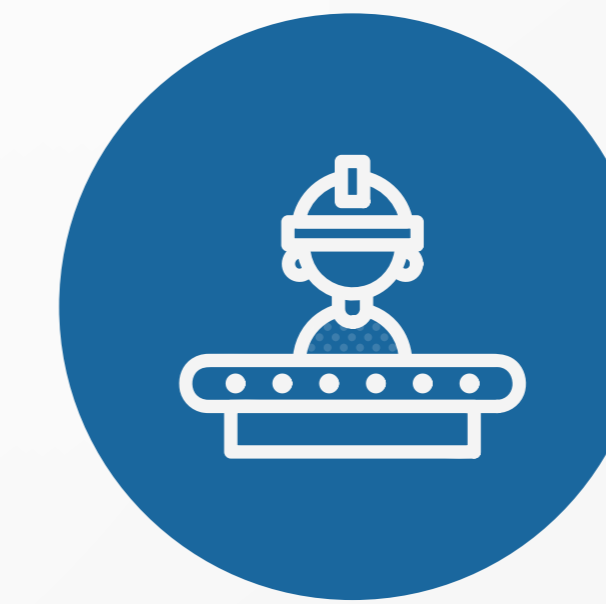

## We Help

Implement Innovative Idea

Customize To Your Needs

Ensure Trustworthy Quality

Shorten Lead Time

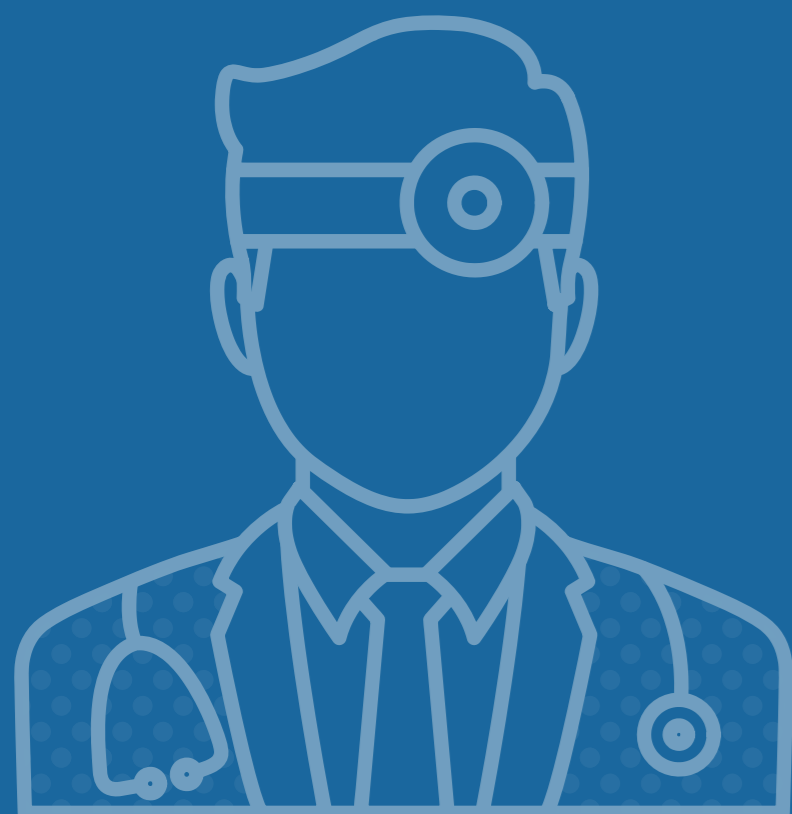

# Our Applications at a Glimpse

## Medical Health

Medical Robotics  
Diagnostics Imaging  
In Vitro Diagnostic(IVD)

## Automotive & Aviation

Aviation  
Automotive Electronic  
Battery & Motor Control System  
E-mobility

## Green Energy

Solar Energy  
Wind Energy  
Energy Storage

## Industrial Application

Automation & Control  
Construction & Transportation  
Industrial Robot  
Measurement Instrument

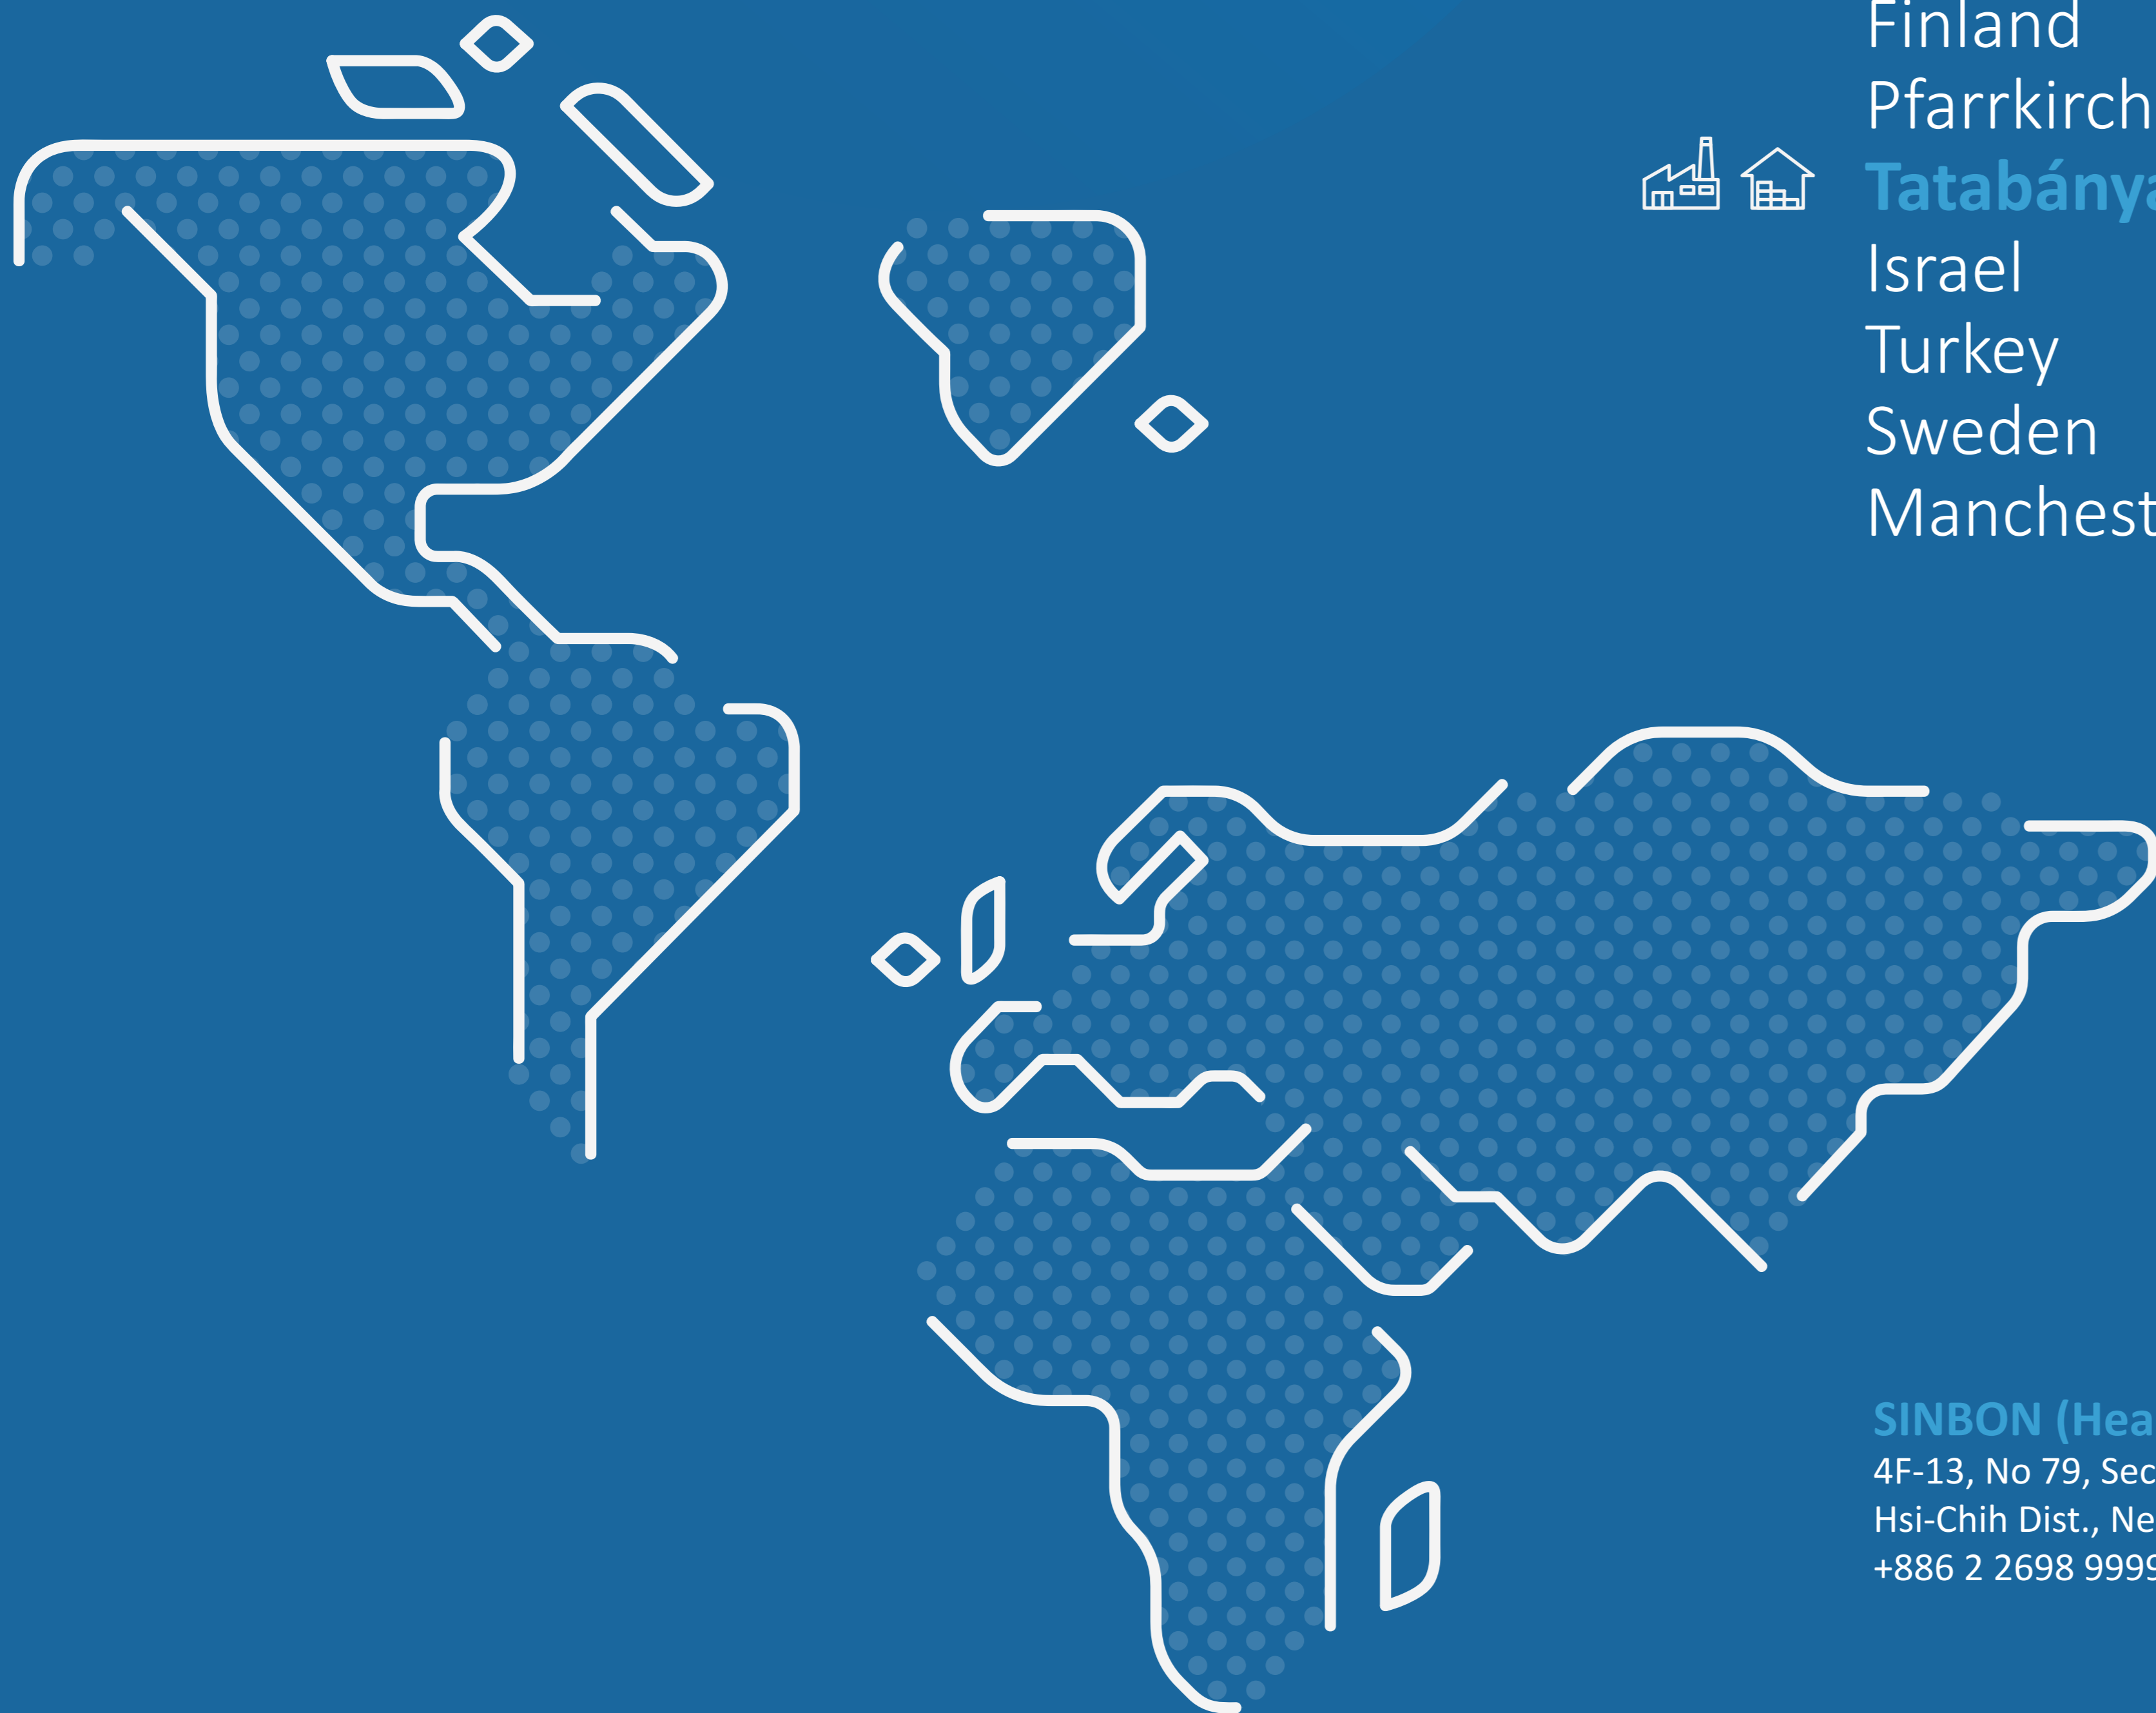

## Communication

Smart City  
Smart Home  
Smart Wearable Device

# Our Quality

Giving our customers top-quality products is SINBON's primary goal. To ensure that we design and timely provide top-notch products to consumers, we uphold the highest industry standards and criteria. Moreover, we are devoted to inventing and producing environmentally friendly and low carbon footprint products by following our ethical and sustainable standards.

| Quality   | Medical Device   | Automotive  | Aviation  | Environment   | Social Responsibility   |
|---|--|---|---|---|---|
| ISO 9001<br>IPC-610 (class2)<br>IPC-620 (class2)<br>UL<br>IECQ<br>QC080000<br>ANSI/ESD S20.20 | ISO 13485<br>MedAccred<br>FDA  | IATF 16949  | AS 9100   | ISO 14001<br>ISO 50001 (2023)   | ISO 45001<br>SA 8000  |
|            |  |  |  |  |  |

# Our Sustainability

In 2021, SINBON adopted ISO 14064-1:2018 standard for greenhouse gas inventory and followed the principles of the Scientific Based Targets (SBT) for energy use and pollution emissions.

In 2022, SINBON commits to the challenge of carbon reduction by 40% by 2030.
