

FPC for next generation IC cards

Thin substrate for IC cards with
thin components and thin batteries

Configuration of FPCs for next generation IC cards

Rechargeable Battery(NGK)

Coil Antenna

Low Profile Component
(TOREX)

The features of this FPC are:

- Contactless charging and recharging
- Thin mounting board
- Optimal antenna design
- Multi-functionalization

How this board is working

The blue LED blinks
: When charging from the coil

The red LED lights up
: When pushing a button

Contact us

Utilizing contactless charging, the things you want to make work on the card , If there is,
Please contact us at the following address.
