Our All In One Approach

At Rebound Electronics, we offer end-to-end solutions designed to streamline every aspect of your supply chain.

From global sourcing and data-driven BOM analytics to proactive shortage management and obsolescence strategies, our services ensure you have seamless access to high-quality components.

Rebound Obsolescence Management Support

Rebound offers a proactive and reactive obsolescence management strategy. We utilise leading market data and strategic supplier relationships to mitigate obsolescence risk.

Our robust obsolescence management capabilities include product life cycle analysis and reverse engineering. These can significantly reduce obsolescence impact on through-life costs for our clients.

Reverse Logistics

Helping you unlock value from excess inventory through flexible stocking solutions, targeted global marketing, and direct purchasing options.
