

Connectivity Where It Matters Most

APTIV AT ELECTRONICA 2026

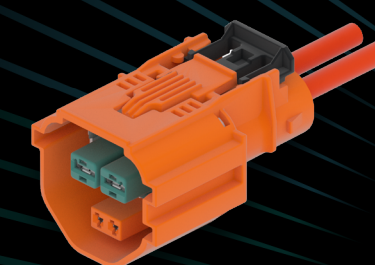

ENABLING SEAMLESS CONNECTIVITY AT SCALE

Connectivity is fundamental to next-generation systems that are becoming increasingly automated, electrified and digitalized. These systems depend on robust networks that reliably distribute power, move data and connect devices across complex architectures.

With a comprehensive portfolio of power and data interconnect solutions, backed by deep system-level engineering expertise, global manufacturing scale and resilient supply chains, Aptiv helps customers design and build advanced systems with confidence.

Visit our booth to see why leading companies trust Aptiv to deliver innovative solutions when performance matters most. Here are some of the technologies on display:

ABOUT APTIV

Aptiv is a trusted technology partner with advanced solutions, efficient processes and deep expertise to support applications that matter most on a global scale.

OUR MISSION

Aptiv's mission is to deliver innovative solutions that people trust when it matters most. This means technologies built to address unique and demanding needs from sensor to cloud, working flawlessly across a wide range of applications that are becoming more automated, electrified and connected. In this demanding environment, our portfolio enables devices and systems across multiple industries to sense, think and act in real time, while being optimized over their complete lifecycle.

MORE TO COME

Aptiv leads the industry with our unique perspective on the latest technologies. For a more detailed view of what you can expect, visit our [Interconnect Technologies](#) page.

WANT IN?

Meet with our experts at Electronica 2026 in Hall 3, booth 317. [Request a meeting](#) in advance to reserve a time that works for you.
