

Manufacturing without limits

When production needs to grow with your ambitions

Growth should never be limited by manufacturing capacity. By combining local expertise with international production capabilities, Norautron gives customers the flexibility, resilience, and scalability needed to take the next step with confidence.

Growth should never be limited by manufacturing capacity. By combining local expertise with international production capabilities, Norautron gives customers the flexibility, resilience, and scalability needed to take the next step with confidence.

Production - more than capacity

In today's market, companies need more than a manufacturing facility. They need a partner that can adapt to changing demand, navigate global supply chains, and support growth in new markets.

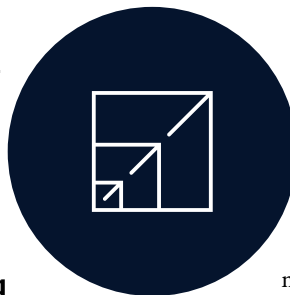

At Norautron, we combine local presence with international manufacturing capabilities.

Scalable manufacturing

With our new 17,000 m² facility in Skoppum, we are doubling our manufacturing capacity in Norway while our international production platform provides additional flexibility.

For our customers, this means:

- Capacity to grow without changing manufacturing partner
- Greater flexibility when market conditions change
- Reduced supply chain risk
- Opportunities for regional manufacturing strategies
- Shorter lead times

A reliable partner in an unpredictable world

The past few years have demonstrated the importance of resilient supply chains.

Through a combination of local presence, international manufacturing sites, and strong procurement organizations, we help our customers build greater resilience against global disruptions and market fluctuations.

More Than Manufacturing

We don't just provide manufacturing capacity. We provide the flexibility, resilience, and scalability our customers need to grow with confidence.

Meet Norautron at Electronica 2026 and discover how our global footprint, expanded capacity, and end-to-end manufacturing expertise can support your next product journey.
